TECH STRATEGY

Platform Comparison for Cana Anime Cafe

ACTIVITY 5 | PRESENTATION & DEMO

The Data Dilemma

Choosing the right foundation for inventory, customer records, and sales management.

Local Infrastructure

On-Site Hardware

- **Direct Control:** Data stays within the cafe walls.
- **No Latency:** Immediate access even during internet outages.
- **One-Time Cost:** Pay for hardware once, no monthly bills.
- **Privacy:** Highly secure against remote web intrusions.

Cloud Infrastructure

The Digital Network

- **Remote Access:** Manage the cafe from anywhere (Home, Work, Commute).
- **Scalability:** Expand storage instantly as our menu grows.
- **Auto-Backup:** Redundant systems ensure no data loss.
- **Low CapEx:** No expensive server room setup needed.

Comparative Analysis

Cost Structure

Local requires high upfront CapEx. Cloud follows an affordable OpEx subscription model.

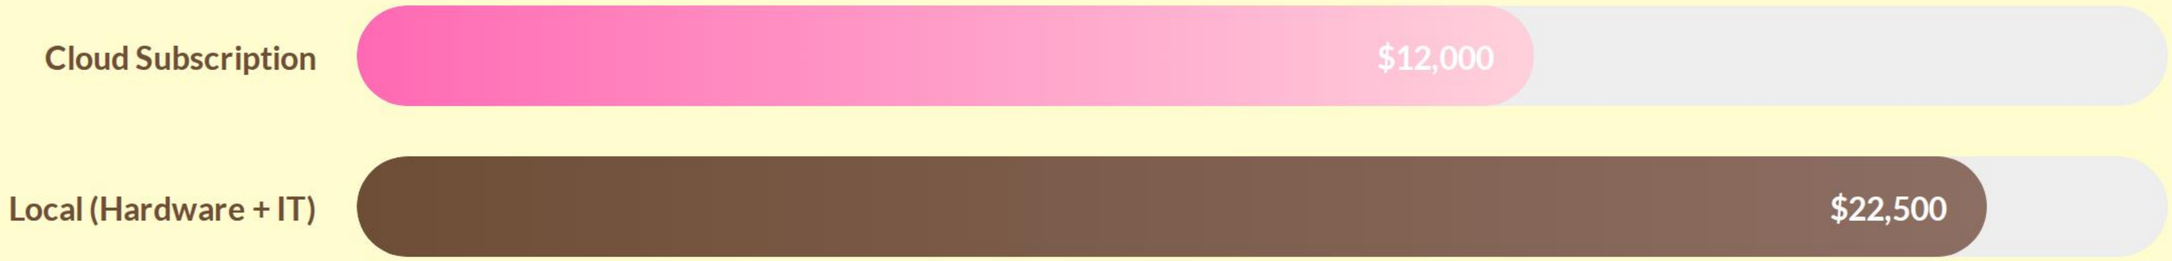
Performance

Local is faster for large files on-site. Cloud depends on internet speed and bandwidth.

Reliability

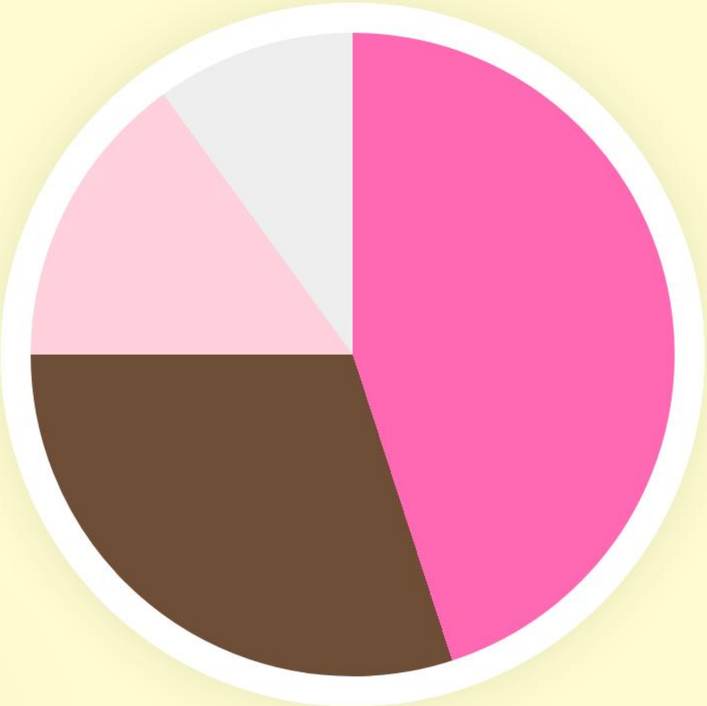
Cloud offers 99.9% uptime with off-site backups. Local is vulnerable to hardware failure.

5-Year TCO Comparison



Note: Local costs include hardware refresh and electricity.

System Load Allocation



- Customer Records (45%)
- Inventory Data (30%)
- Staff Logs (15%)
- Other (10%)

Collaborative Power

Syncing Every Unit

Cloud platforms allow our Kitchen Staff and Front Desk to stay perfectly synced in real-time. This eliminates order errors and ensures "First-In, First-Out" accuracy for our anime-themed treats.

Verdict: Cloud storage is the optimal path for Alligen's Cana Cafe expansion.

System Reliability Logic

Availability (A) Formula

To ensure the cafe never stops brewing, we calculate system uptime:

$$A = \frac{MTBF}{MTBF + MTTR}$$

MTBF: Mean Time Between Failures

MTTR: Mean Time To Repair

Migration Roadmap

Week 1

Data Audit

Week 2

Setup Cloud

Week 3

Migration

Week 4

Live Launch

Decision Matrix

Feature	Cloud Storage	Local Storage
Initial Setup Cost	Low (Zero hardware)	High (Server/UPS)
Internet Dependency	Critical	Minimal
Scalability	Infinite / Instant	Manual / Slow
Disaster Recovery	Automatic	Manual Backups
